Save the date for our upcoming event!

UrbanLab Pune: Smart Spaces for People

June, 2018

27th: Conference & Workshop Part I

28th: Workshop Part II

29th: Workshop Part III

HOW TO BRING PROPOSALS INTO PRACTICE?

WHO WE ARE

A joint research cooperation with the integrated approach to develop holistic solutions to specific challenges of an urban setting. IGSI sets people and their needs as users and designers of urban spaces in the center of transformation processes. Our network represents all relevant layers of a smart city, which sets us in the position to see those processes through, from early stages of analyses and conceptualization up to implementation, operation and monitoring.

WHAT WE OFFER

IGSI offers expertise in applied fundamental research, integrated strategies and integrated solutions in all relevant fields of a smart city. We offer in-depth knowledge in the fields of urban planning and design, architecture, urban management, infrastructure development, and are able to accompany projects from concept design up to implementation.

CONTACT US!

We are looking to an exchange of ideas with academia, planners, stakeholders, individuals and project developers for Indian smart cities.
